

a valued business partner

## Enjoy a beautiful day, every day

TESS Backlit Views to Nature™ are designed to meet the goals throughout the emerging healthcare market for supportive, spirit-based healing environments. In the form of Virtual Windows and Virtual Skylights they create uplifting, positive distractions for the patient and a cost effective model for hospital administrators.

### Features & Benefits of TESS programs:

- ★ Transform windowless areas into more compassionate, patient focused healing environments.
- ★ Reduce patient stress, comforting the patient and their family.
- ★ Create healthier and more productive workplace for the staff.
- ★ Provide an effective, cost efficient marketing tool for hospital administrators.
- ★ Offer a holistic healing model for body, mind and spirit which crosses the boundary of language, race, gender and creed.

### Other Applications:

- Dental Offices
- Free Standing Centers
- Corporate Business Offices
- Executives Suites
- Conference Rooms
- Office Cubicles
- Business Reception Areas
- Birthing Centers

## **TESS now in the Kingdom of Saudi Arabia :**

Among other projects, TESS in association with Al-Kaws subcontracting group in Riyadh, Saudi Arabia has successfully installed a backlit Skylight in the CyberKnife treatment room at King Faisal Specialist Hospital & Research Center. TESS made a powerful penetration into the Saudi market by installing its skylight in one of the largest leading hospitals in the Kingdom while complementing the historical installation of the first CyberKnife ever in the Middle East. The Saudi market looks forward to more TESS installations of that kind.

***TESS USA Inc. has been a major influence in making healthcare environments an integral part of the healing and wellness process since 1994.***

TESS provides realistic Backlit Views to Nature. All of our backlit products show dynamic color, clarity and depth. The TESS Custom Program allows you to view your image in any shape, tailored specifically for your environment.

***View the sky, the galaxies, overhead trees, and much more...all indoors.***
