

## **ARTIFICIAL WINDOWS AND MURALS FOR WALLS OR SKYLIGHT PANEL VIEWS**

**TESS (Therapeutic Environmental Solutions) provides the highest quality backlit mural views to nature for all windowless areas of the healthcare facility. Artificial windows and framed murals for the wall or skylight panel views for the ceiling create a patient-focused, healing environment. These TESS products greatly reduce patient stress and apprehension and establish a healthier more productive workplace, while lifting the spirits of patient and staff alike.**

**Nature therapy in the form of views to nature has been well documented over the years as transforming the clinical setting into an environment fostering the healing process and wellness. In this highly technical era, it is important to address the full spectrum of patient needs (physical, emotional and spiritual) in conjunction with the profound medical procedures offered. With this objective, TESS has perfected the medium of photographic imagery in beautiful views to nature for the state-of-the-art healthcare facility of the 21st century.**

**All high focal-point windowless areas of the hospital should be targeted:**

- Radiology and imaging centers (MRI, CT, Nuc Medicine, Ultrasound)**
- Radiation and medical oncology (Treatment Rooms / Chemotherapy)**
- The critical care units (a backlit panel view to nature above each bed)**
- Labor and delivery-birthing rooms and suites**
- Cardio cath labs and surgical holding and prep areas**
- Exam rooms, consult rooms, cafeterias, lounges and chapels**
- Corridors, hallways, tunnels, waiting rooms and entry / foyers**

## **VIRTUAL WINDOWS, WALL MURALS AND SKYLIGHT CEILING PANEL SYSTEMS**

**TESS virtual windows, wall murals and the skylight ceiling panel systems are custom-made and specifically tailored to meet the environmental, spatial and design requirements of each individual room. The standard TESS wall units are recessed or wall mounted, while the skylight ceiling panels are cut to fit snugly within the standard lighting fixture or ceiling grid structure.**

## **MRI ART AND LIGHT PANEL SYSTEM FOR MRI WALLS AND CEILINGS**

**TESS has a revolutionary patented MRI art and light panel system for the MRI walls and ceilings that is unique to the industry. This complete MRI art therapy system does not breach the shield, is certified for all magnet frequencies and can be installed while the**

**magnet is in operation. The system comes complete with an art panel (view to nature) and a lumi-light panel (light System), plastic spacers, plastic connectors, copper-wire shielded cable, aluminum voltage inverter box and simple installation drawings. There is nothing on the world healthcare market that compares to the TESS MRI art and light panel system.**

## **LARGE FORMAT DURATRANSPARENCY PHOTOGRAPHIC REPRODUCTIONS**

**For all TESS products the actual art panels or views to nature are large format duratransparency photographic reproductions fabricated at our TESS color correct commercial lab. This TESS product fabrication lab utilizes the latest in digital photo processing equipment and the highest quality materials. The result is an impeccable product with precise resolution, density and color saturation for each chosen nature scene.**

## **IMAGE LIBRARY - VIEWS TO NATURE**

**The TESS image library has hundreds of beautiful, large format photographic images, which offer a variety of seasons and nature-escapes to choose from. The TESS library is constantly updated with new images from around the world recently captured by our exceptional team of professional photographers. Each is a commercial photographer by profession and an expert in large format photography, with their artistry found in galleries, museums and private collections. Alternatively, TESS offers reproductions of the unique and whimsical original paintings of the world-renowned artist, David Miller, owner of Maui Art. His collection of sea life and seascapes has been photographed and licensed exclusively for the entire TESS product line.**
